

Loutor

Project; Castle DARKSTONE.

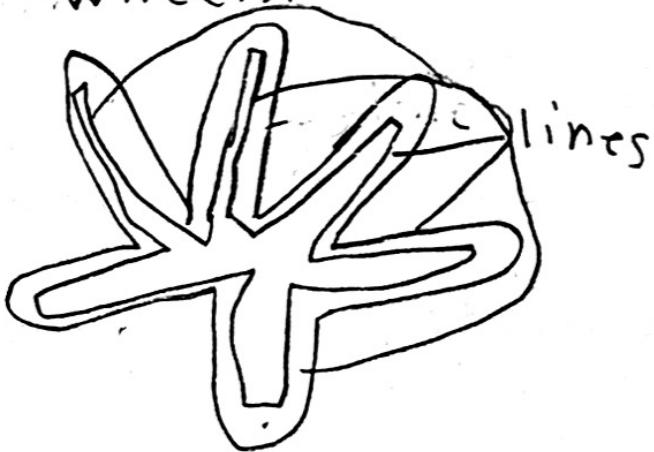

How to make DARKSTONE..

Used mostly like CASTLE ARUS.

Launching Area; Put lines
on inside the launching strips
for ship's wheels.

Trap:

Trap; Put a small vent

in front of the wall.

In front of the vent,
put two "Skull Scavengers"
there.

Put places to place their

feet, when they turn around,
the people in the vent fall to
the jail. This happens when
under the vent there
is a slot, when a skull's
turns around, the slot moves,

← when he turns.

Jail: Make a cage to put
people in.

Laser Snakes;(See Full Laser.)

Put a shell on top.
Make a button, when
you push it, the shell
opens and it is multiplied.

← multiplying

Full Laser; Make a spring
and put laser on spring
make a doors when you
open its the laser pops
out,

Throne Room; Make steps,
at the top of them, put a
throne. NOTE! Make
sure to leave a lot of
room around throne.

Thinking Room; Make a
room with chairs.

Bomber; Make a room
with bombs to put
in FULL LASER.

Scrap Metal; Put warriors
in a room, make the warriors
able to be taken apart.

Scanner; Put a chair in
front of a screen with button

weapons on it.

Window: Make a window.

Weapon Marker: Make a
machine with weapons in
it.

Lion Chains: Make chains
to grip VOLTRON'S
Lions.

underneath it.

Robeast Control; (For controller
see SCANNER) Make about
ten chairs in front of it.

Gallery; Make a table with
seats around it, and bottle
on top of it.

Weapons; Make a rack with

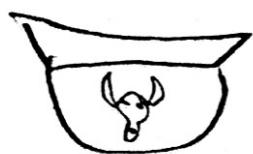

Guard Patrol: Make a
gate with a few "Skull
Scavengers" in front of it.

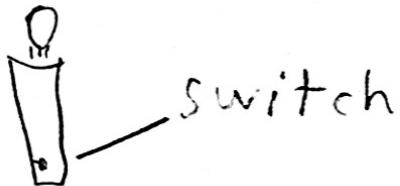

Robeast Pit: Make a bowl
with fake bones in it.

Tournament: Make a football
stadium at the wall at the
bottom, put doors. On the
outside, make this sign:

Cannon; Make a deep hole where I showed you, put bombs in it, flick a switch and fire!

Robeast Maker; Put places for a Robeast to stand, Put two bars on the sides, at the tip of them make lasers aiming for his head.
